CurrentDiagnosis

Strengths

- Hybrid Profile: Unique combination of Humanities (Master's level) and Hard Tech (Python, AI).
- Tech Stack: Proficiency in HTML, XML, CSS, and UX/UI Design principles.
- Domain Expertise: Specialized skills in Digitizing Artifacts and applying AI to cultural datasets.
- Adaptability: Ability to translate complex historical data into digital, user-friendly interfaces.

Weakness

- Visibility: Low digital footprint of technical projects (e.g., hidden GitHub repos).
- Narrative: My current profile might look like a "Generalist" rather than a "Specialized Expert."
- Portfolio Status: Lack of a centralized, high-end UI/UX showcase for my DH artifacts.

Oppurtunities

- Digital Transformation: High demand for "Digital Officers" in museums, archives, and libraries.
- AI Boom: Significant funding and interest in Generative AI and Computer Vision for cultural heritage.
- Niche Market: Very few candidates possess both the "Soul" of a historian and the "Brain" of a developer.

Threats

- High Competition: Standard Web-Developers moving into the cultural sector.
- Rapid Tech Evolution: The need to constantly update AI and Python skills to stay relevant.
- Market Awareness: Some traditional cultural institutions might not yet realize they need an "AI Specialist."

2026

Strategic Objectives

Digital Portfolio

- Objective: Launch a custom-coded (HTML/CSS/JS) portfolio website.
- Goal: Showcase 3+ core projects: AI-driven artifact analysis, XML/TEI data structuring, and UX/UI design for digital archives.

Technical Mastery & Continuous Learning

- Objective: Expand the technical stack beyond Python and AI before Master's graduation.
- Goal: Complete professional certifications in R (Data Science) and JavaScript (Interactive Web) to become a "Full-Stack DH Developer."

Internships & Experience

Goal: Secure at least one internship or freelance project in a tech-focused cultural institution or AI startup to apply my DH skills in a high-paced, real-world business environment.

Industry Engagement

- Objective: Actively participate in the Digital Humanities Event
- Goal: Attend at least 3 major industry conferences or workshops to bridge the gap between academic theory and market needs.

2026

ActionPlan

Product Development

Design and code the personal portfolio using HTML/CSS/JS to showcase UI/UX skills.

Technical Development

Enroll in advanced R for Data Science, Python and JavaScript bootcamps

Strategic Internship

Apply to at least 5 targeted tech-focused cultural institutions or AI startups per month

Active Industry Networking

Register for 3 major DH or AI conferences to engage in direct knowledge exchange

2026

Metrics Vision

The gap between 'Current State' and 'Importance' defines my tactical focus for the rest of my Master Degree.
